

## Should I Get a Free Consultation with CTOAM?

A consultation with CTOAM will benefit many people.

### You should book a consultation if...

1. You have already been diagnosed with cancer and want a **second opinion** to ensure your treatment plan is the best for you.
2. You think you might have cancer and want to find out for sure.
3. You have tried standard treatment (chemo, radiation etc.) and it's not working.
4. You have been told chemo is your only option and you want to avoid it.
5. You have been told by your oncologist that they have run out of treatment options for you and that palliative care is the next step.
6. You have an upcoming surgery and want to make sure you really need it and, if so, that it's optimized for success.
7. You are on chemo and want to find out if it can be optimized.
8. You want to know which supplements and foods you should be consuming to enhance your cancer treatment (proven and backed by science).
9. You want to know if **immunotherapy** can work for you.
10. You are seeking emotional support for yourself or loved one during this challenging time.
11. You have been told your cancer is gone and want to be sure this is accurate.
12. You have a family history of cancer and want to find out your inherited genetic risk factor.
13. You want to find out your general risk for cancer.
14. You want to find out how you can best prevent cancer for yourself or loved ones.
15. You are a family member or friend of someone with cancer and want to ensure they're getting the most effective treatment.
